

# The 3rd UNISEC-Global Meeting Programme

3-5 July 2015, Tokyo, Japan

Organized by  
**University Space Engineering Consortium (UNISEC)**  
in cooperation with  
**University of Tokyo and Kyushu Institute of Technology**

## 1. Background

Our planet has no national boundaries as seen from outer space. Recent globalization has been demonstrated in many areas, such as financial markets, air pollution, and global warming. The University Space Engineering Consortium (UNISEC) believes that providing good educational opportunities to future generations worldwide will lead to a better future, as the resolution of global problems requires a cooperative effort. UNISEC has provided practical space engineering education since 2002 in Japan, and its activities have been spread to the rest of the world through international programs, such as the Mission Idea Contest (MIC), CanSat Leader Training Program (CLTP), and Nano-satellite Symposium, with warm support from many individuals and institutions in various regions around the globe. Under circumstances where university associations have been formed in several countries, UNISEC, together with these countries, established the UNISEC-Global in 2013. One of its main purposes is to facilitate collaborative efforts beyond national boundaries, and to contribute to the development of solutions to global issues. The UNISEC-Global has its 3rd meeting in July 2015.

## 2. Objectives of the 3<sup>rd</sup> Meeting

Based upon the establishment of UNISEC-Global and other decisions at the first UNISEC-Global Meeting in November 2013 at the University of Tokyo in Japan,

- To follow up the successful outcomes made at the second UNISEC-Global meeting at the Kyushu Institute of Technology, Kitakyushu, Japan on November 18-20, 2014,
- To review the on-going activities of the new local chapters (11 countries/regions and one association of local chapters), which were acknowledged at the 2nd UNISEC-Global Meeting and to share information for further advancement,
- To acknowledge new applications for the UNISEC-local chapters,
- To provide a forum for the UNISON-Global (student organization) to exchange their opinions about research activities and issues they face for closer cooperation at a student level around the world,
- To contribute to exploring every possibility of using micro/nano-satellites for scientific, social and economic needs, with technical and financial feasibilities,
- To contribute to identifying and finding new aspects of space science and engineering through in-depth discussion on an item by item basis.

**3. Venue:** Takeda Hall, Asano Campus, the University of Tokyo, Tokyo, Japan  
2-11-16, Yayoi, Bunkyo-ku, Tokyo

**4. Language:** The language used at the Meeting is English.
