CanSat

Several CanSat prototypes have been designed and developed for the implementation of the CanSat National Course in Mexico.

It is taught in two modules, theoretical and practical.

CanSat

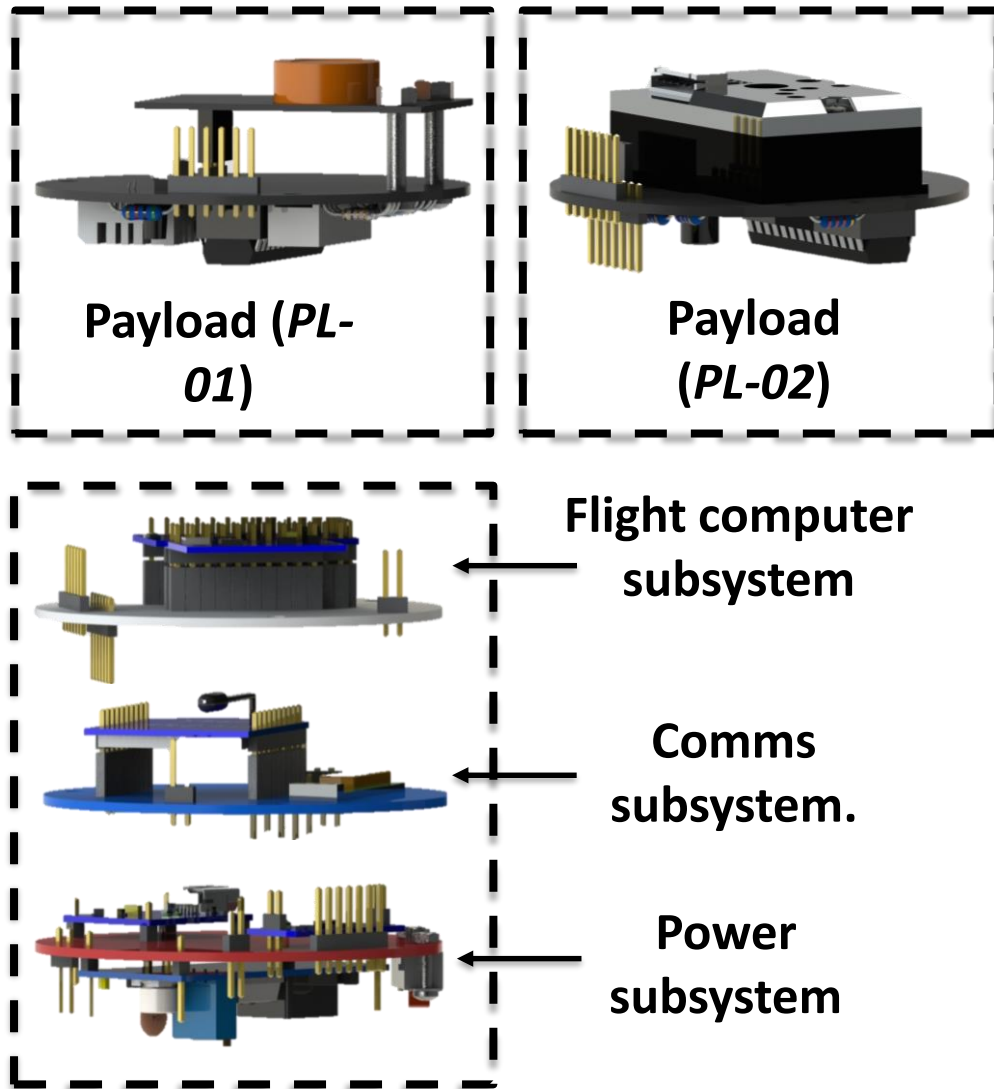

The course is developed based on the Space Systems Engineering methodology.

CanSat AEM 1

The latest prototype was developed in 2015:

The CanSat AEM -1 is constituted of three main PCB, and a structure that allows the incorporation of one payload.

CanSat AEM 1

The latest prototype was developed in 2015:

The CanSat AEM -1 is constituted of three main PCB, and a structure that allows the incorporation of one payload.

Payload
(PL01)

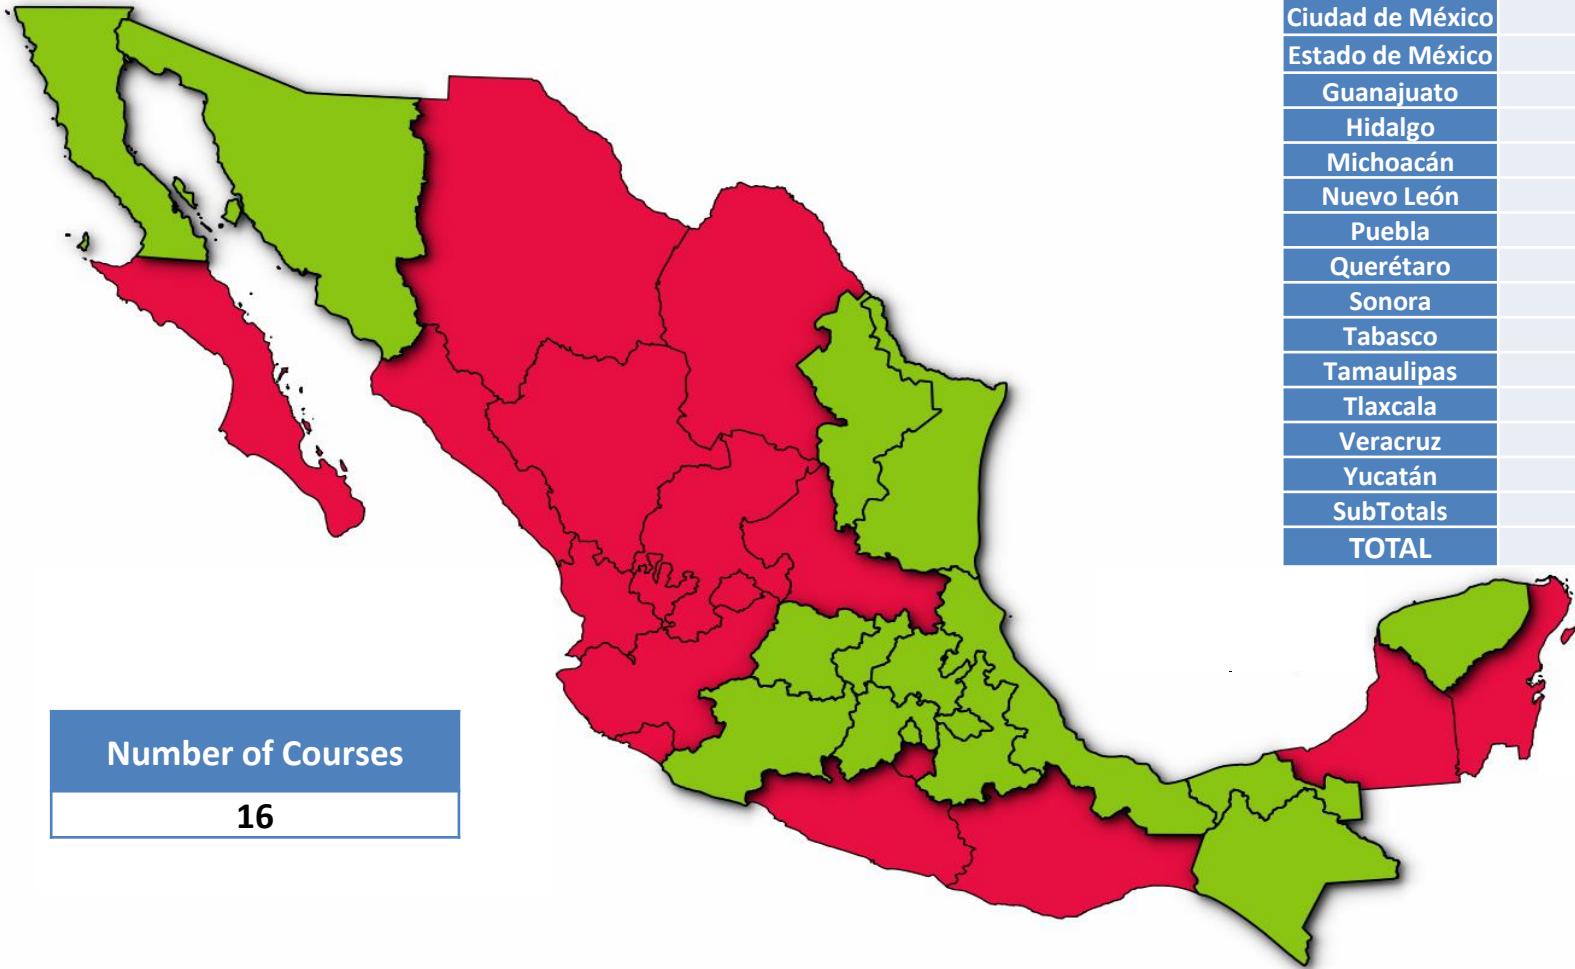

Payload (PL-02)
