

GRAZIE VINAKA

Objectives

- analyse both organisation assets,
- derive ideas for a potential collaboration
- evaluate the impact of a Global Space Job Fair.

Result - Assets

- Capacity in trainings (HEPTA-Sat, CanSat)
- Global presence and recognition
- Competitions
- Industry support

Results - Ideas

- Provide access to international candidates
- Local vs global events (companies etc)
- Career service and mentorship
- Invite companies to talk about their career options (inspire)

Results - Ideas

- Continue #UNIGLO7 agenda; invite all participants; part of program
- Tour / visit to companies involved (if Space Job Fair not possible)

Results - Evaluate

- Can have great impact; not (yet) in all countries possible
 - but needed
- Demand will increase in the near future
- Connecting capacity building and career service can lead to more awareness
- Audience is different: careers vs. internships

Results - Evaluate

- Can have great impact; not (yet) in all countries
 possible but needed > Blueprints, ID vs. JP
- Demand will increase in the near future > Timing OK
- Connecting capacity building and career service can lead to more awareness
- Audience is different: careers vs. internships

Verdict

- Too early for a Global Space Job Fair
- Ideal time for Global Space Career Service
- Blueprints

Verdict

- Too early for a Global Space Job Fair
- Ideal time for Global Space Career Service
- > Talent and Entrepreneurship
- > Blueprints

What's next - Options

- Questionnaire with POC, industry stakeholder
- Connect career related topics to HEPTA-Sat
- Offer career services at UNISEC-Global (related) events
- Start developing a framework, incl. blueprints

Thank you
