

UNISEC-GLOBAL VIRTUAL MEETING
OF
19 July 2025

Opening Remarks

by George Maeda
ArkEdge Space

Is your university seeking to get involved in space projects for your students?

**Two reasons why
you should consider
using J-Cube to
launch your
university CubeSat**

REASON #1

Using J-Cube to launch your 1U or 2U or 3U CubeSat is much less costly than using a commercial launch service.

REASON #2

Using the services of J-Cube is a good way to develop your new space program via international collaboration. **Note:** To use J-Cube you must team up with a university in Japan. This would benefit you immensely.

Today's Agenda

Today you will learn the details of J-Cube from the experts.

About 30 minutes are set aside for Q&A at the end of this meeting.
