

Experience at Akihabara & Asakusa – CLTP 14

Muhammad Rizwan Mughal
Sultan Qaboos University
Oman

1. Mission Design

- As part of the CLTP 14 program, teams designed their own **space missions** using Heptasat kits.
- Groups identified **key components** required for their satellite mission implementation.

2. Akihabara Visit

- The Akihabara visit provided a **real-world market experience** for sourcing these components.

2. Akihabara Visit

3. Component Procurement

- Teams explored electronics stores to check availability of:
 - Sensors & actuators
 - Communication modules
 - Power and control boards
- Gained insights into component selection, cost, and feasibility for their missions.

4. Asakusa Evening Program

- After the technical tour, participants joined a well-organized social dinner in Asakusa.
- Space industry professionals attended, creating opportunities for:
 - Networking
 - Sharing experiences
 - Strengthening collaboration in an informal setting

4. Asakusa Evening Program (cntd)

- After the technical tour, participants joined a well-organized social dinner in Asakusa.
- Space industry professionals attended, creating opportunities for:
 - Networking
 - Sharing experiences
 - Strengthening collaboration in an informal setting

4. Asakusa Evening Program (cntd)

- After the technical tour, participants joined a well-organized social dinner in Asakusa.
- Space industry professionals attended, creating opportunities for:
 - Networking
 - Sharing experiences
 - Strengthening collaboration in an informal setting

5. Reflections

- **Integration of training + practice + culture:**
 - Teams applied mission planning to real-world procurement.
 - Expanded understanding of project workflow
 - design → sourcing → implementation.
 - Bonded with global participants and industry experts.
- A memorable highlight of CLTP 14, blending **technical depth with cultural immersion**.

Thank You !
